

MOUNTING SYSTEM FOR FINE SINKS

Professional sink mounting system for sinks up to 46" wide and 400 lbs.

KEY FEATURES:

- *Reduced installation time*
- *Rimless and rimmed sinks*
- *No cabinet modifications*
- *No countertop modifications*
- *Adjustable even after countertop is installed*
- *Allows for easy sink removal*
- *100% stainless steel construction*
- *Support sinks that have fallen due to glue failure*

WHY CHOOSE PETE'S SINK MOUNT?

- **Fast** - Save installation time and money
- **Easy** - Professional results due to unlimited, precision adjustment even after countertop is installed
- **100% stainless steel construction** ensures no mold and no rot from future water seepage
- **Tested to over 400 lbs** during installation. Tested to over 600 lbs to account for disposal, pots & pans and water.
- **Low profile support rails** provide more room for plumbing connections, disposal installation and storage
- **Rimless and rimmed sinks**, supports sink from the bottom
- **No mechanical fastening or modifications to countertop** = no potential countertop damage
- **Perfect solution** for under mount, flush mount and raised mount sinks

- **Installs with basic tools** (drill, #3 Phillips screwdriver, tape measure, straight edge, pencil)
- **Apron and standard sinks**
- **Easy sink removal at any time**
